

# Manual powder coating of alloy wheels on floor mount conveyor.

Three EncoreLT systems provide powder delivery on repaired wheels at a new purpose-built line for Rader at Parkway Prestige, Trafford Park (UK).

## From the customer

“After numerous trials with various competitive systems, Nordson’s EncoreLT quickly became the clear winning choice for Rader.

Since having the units installed and commissioned, with clear and concise operator training, EncoreLT is now our approved group manual system, having exceeded all of our initial expectations.”

## Why manual application?

Due to the intricate nature of the parts, manual application is preferred (normal in the industry).

## Specifications:

Year of construction: 2015  
 Type of components: Wheels  
 Product diameter: 24” (max)

Unit Type: EncoreLT x 3  
 Cabin: Bespoke  
 Filters: Cartridge (Bespoke)  
 Colour change: 3 min average  
 Pump: Venturi (x 3)

## About the plant:

- New, £500,000 bespoke facility with line and ovens installed at Parkway Prestige accident repair centre, designed as a “clean environment”, targeted at high-end customer base.
- Long-term plan is to upscale production and use automatic Nordson application equipment.
